

aringarannagovartscollegev-dev-ed.develop.lightning.force.com/lightning/setup/SetupOneHome/home

The screenshot shows the Salesforce Setup Home page. At the top, there's a navigation bar with icons for back, forward, search, and user info. Below it is a header with 'Setup' and 'Home' tabs, and a 'Search Setup' bar. On the left, a sidebar lists various setup tools like 'Setup Home', 'Service Setup Assistant', and 'Optimizer'. The main content area has a 'Home' tab selected under 'SETUP'. It features three cards: 'Get Started with Einstein Bots' (AI-powered bot), 'Mobile Publisher' (create branded mobile app), and 'Real-time Collaborative Docs' (transform productivity with docs, spreadsheets, and slides). Below these is a section titled 'Most Recently Used' with a table showing 1 item. The table has columns for 'NAME' and 'TYPE'. The URL in the address bar is https://aringarannagovartscollegev-dev-ed.develop.lightning.force.com/lightning/setup/SetupOneHome/home?setupApp=all.

aringarannagovartscollegev-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/new

The screenshot shows the Salesforce Setup interface for creating a new custom object. The top navigation bar includes links for Setup, Home, and Object Manager. The main title is "SETUP New Custom Object". Below the title, a message states: "Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles." Buttons for "Save", "Save & New", and "Cancel" are available. The "Custom Object Information" section contains fields for "Label" (set to "Account"), "Plural Label" (set to "Accounts"), and a checkbox for "Starts with vowel sound". A note says "The Object Name is used when referencing the object via the API." with a field set to "Object Name". A "Description" text area is also present. A footer link "Open the standard Salesforce.com Help & Training window" is at the bottom.

Specify the type of information that the custom field will contain.

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

The screenshot shows the Salesforce App Manager interface for creating a new Lightning App. On the left, a sidebar lists various Salesforce components like Data, Apps, and Communities. The main area is titled 'New Lightning App'. It has two sections: 'Available Items' and 'Selected Items'. The 'Available Items' section lists several standard Salesforce objects and features. The 'Selected Items' section contains 'Passports' and 'Payments', which have been moved from the available list. At the bottom, a progress bar shows the process is complete (step 5 of 5). The bottom navigation bar indicates the 'Lightning Bolt Solutions' app is currently selected. The status bar at the bottom right shows the date and time.

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label: Location Example: Account

Plural Label: Locations Example: Accounts

Starts with vowel sound:

The Object Name is used when referencing the object via the API.

Object Name: Location Example: Account

Description:

Context-Sensitive Help Setting: Open the standard Salesforce.com Help & Training window
 Open a window using a Visualforce page

Content Name: None

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: Location Name Example: Account Name

Data Type: Text
